**Re Item V**

**Reasoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement**

Reference is made to the following documents:

- D1: DATABASE WPI Section PQ, Week 199236 Derwent Publications Ltd., London, GB; Class Q73, AN 1992-292958 XP002227210 & CN 1 057 100 A (WU S), 18 December 1991 (1991-12-18)  
D2: US-A-5 807 413 (BERLOWITZ PAUL JOSEPH ET AL) 15 September 1998 (1998-09-15)  
D3: US-A-4 364 725 (BUSCHULTE WINFRIED) 21 December 1982 (1982-12-21)

1. The present application does not meet the criteria of Article 33(1) PCT, because the subject-matter of claim 1 does not involve an inventive step in the sense of Article 33(3) PCT.

Document D1, which is considered to represent the most relevant state of the art, discloses the use of a synthetic liquid fuel in a yellow flame burner, as an alternative to hydrocarbon fuel (CN 1 057 100 A : abstract, last line: "It can be fired with ... ***synthetic liquid fuel***").

It is **generally known** to the person skilled in the field of fuels and in the field of burners, that a Fischer-Tropsch derived fuel is a typical example of a **synthetic** liquid fuel. D2 is merely cited as an example of that in the field of fuels. Therefore, as suggested in D1, a skilled person would use a Fischer-Tropsch derived fuel as a synthetic liquid fuel in the burner of D1, without the exercise of inventive skill.

2. Dependent claims 2-17 do not appear to contain any additional features which, in combination with the features of any claim to which they refer, meet the requirements of the PCT with respect to inventive step, the reasons being as follows:

- i. The additional features of claims 6-9 are disclosed in document D2 (col.20 ln.20-63, col.2 ln.18-19, ex.2, tab.3,5).
- ii. The additional features of claims 2-5 and 10-16 come within the scope of the customary practice followed by persons skilled in the art, especially as the advantages thus achieved can be readily contemplated in advance. Consequently, the subject-matter of claims 2-5 and 10-16 also appears to lack an inventive step.
